CHAPTER 7

CUBIST™
Chapter 7, Cubist™, is inspired by the Avant-Garde movement from the early 20th century known as Cubism. Strong geometric shapes and high contrast design are leading themes of the Cubism movement and are present in the tiles featured in this collection.

Cubism is commonly known for its use of two-dimensional parts that come together to create a larger perception of depth through the use of perspective. Much like Cubism, the use of tile in a space breaks up entities and reassembles them in an abstract way, allowing the space to be experienced uniquely.

Keeping these themes in mind, we developed several natural stone mosaics, field tiles and trim pieces for this collection.

Please Note:
- All product shots are artistic interpretations of actual product. Due to the nature of the printing process, we recommend obtaining physical samples of product for actual color representation.
- Chapter 7 Cubist reflects the shade variations associated with natural stone. As with all natural stone tiles, we strongly recommend laying out and blending the tiles prior to installation. This step will ensure a proper color blend in order to achieve a classic look for your installation.
- We recommend installing Chapter 7 products using a high-quality white thin set. Sealing all natural stone tiles with a high quality sealer prior to grouting to ensure an easy cleaning and as part of a maintenance regimen is also highly recommended. Consult your sealer manufacturer for reapplication recommendations as part of an ongoing maintenance routine.

- **Nero Marquina**
  - Avant Mosaic (72084)

- **Bardiglio**
  - Avant Mosaic (72078)

- **Gold**
  - Avant Mosaic (72087)
CARVE MOSAIC

A combination of large and small hexagon pieces overlap to form a distinctive larger abstract hexagon shape.
The placement of colored natural stones or metal pieces, along with polished accents, bring depth and contrast to this mosaic.

High quality sealer prior to grouting to ensure an easy cleaning and as part of a maintenance regimen is also highly recommended.
Bold geometric patterns are created by the careful placement of cuts combined with colored natural stones or metal pieces, and polished accents, illuminating the Thassos marble.
